

Eucalyptus Essential Oil - Product Catalogue

Our eucalyptus oil is produced from Eucalyptus globulus leaves harvested from certified Indian plantations. Leaves are processed the same day using steam distillation to preserve purity, potency, and natural aroma. Each batch is laboratory tested to confirm high eucalyptol content and consistent quality for industrial and commercial use.

Key Product Features

Feature	Details
Botanical Name	Eucalyptus globulus
Extraction Method	Steam Distillation
Eucalyptol Content	70% - 85%
Purity	100% Pure Essential Oil
Testing	GC-MS Lab Tested

Packaging Options

Pack Size	Approx Weight	Packaging Type
25 kg	~23 kg	Food Grade HDPE Drum
50 kg	~46 kg	HDPE Container
100 kg	~93 kg	Industrial Drum
200 kg	~186 kg	Aluminium / Steel Drum

Applications

Used across multiple industries including pharmaceuticals, cosmetics, personal care products, aromatherapy, oral care formulations, pain relief balms, shampoos, industrial cleaners, and air fresheners.

Quality and Compliance

Our eucalyptus oil meets ISO 770, British Pharmacopoeia (BP), and US Pharmacopoeia (USP) standards. Each shipment includes Certificate of Analysis (CoA), GC-MS Report, MSDS, and export documentation.
